Profile Summary:

- Over **4+ years** of extensive experience as a Front End UI Developer with solid understanding of database designing, development and installation of different modules.
- Experience in all phase of SDLC like Requirement Analysis, Implementation and Maintenance, and extensive experience with **Agile and SCRUM**.
- Proficient in building Web User Interface (UI) using **HTML5, DHTML**, **XHTML, CSS3** and **JavaScript** that follows **W3C** Web Standards and are browser compatible.
- Experience on Web Technologies using **HTML 5, CSS3, XHTML, DHTML, JavaScript, JQuery, AJAX, XML and JSON.**
- Solid experience with **Responsive Web Design (RWD).**
- Good experience in latest version of JavaScript libraries like **Angular 6/5/4/2, TypeScript, React.js, Node.js and Ext.js.**
- Excellent experience in developing web pages complying with Web Content Accessibility Guidelines (WCAG) and ability to apply **W3C** web standards.
- Experienced in building **cross browser** compatibility applications using **HTML5 and CSS3**.
- Extensive experience in creating style guides, best practices and setting **UI standards** for enterprise/consumer applications.
- Experience with **Grunt, Gulp and Bower** modules of **Node.JS.**
- Very good experience in Document Object Model (DOM) and **DOM Functions.**
- Well-versed in Object Oriented Programming **(OOP)** with **JavaScript.**
- Experience in designing UI patterns and UI applications with the help of Adobe products like Adobe Dreamweaver CS3, Adobe Photoshop CS3/CS4, Adobe Fireworks CS3 and Adobe Illustrator CS3.
- Knowledge and experience in working with **SASS/LESS** as CSS preprocessors and modern techniques such as **Flexbox.**
- Experience on working with **CSS Background, CSS Layouts, CSS positioning, CSS text, CSS border, CSS margin, CSS padding, CSS table, Pseudo classes, Pseudo elements** and **CSS behaviors in CSS.**
- Experience in using Configuration Management tools (Version Controllers) like **Tortoise, SVN, and GitHub.**
- Highly motivated, reliable analytical problem solver and troubleshooter with strong attention to detail.
- Quick learner and proficient in solving the technical issues in the project.
- Excellent analytical and communication skills with capability to handle new technologies.

Skills Set:

Technologies: HTML5, CSS3, XML, XHTML, DHTML, JavaScript, ASP.net, Java, C#, AJAX, JQuery, JSON, Responsive Web Design, LESS and SASS, Flexbox, DOM, Bootstrap.
JavaScript Libraries: Angular 6/5/4/2, TypeScript, Ext.js, Node.js, React.js, Redux.
IDE's: Eclipse, Aptana Studio, Notepad++, Dreamweaver, Flash, Action Script.
Version Controls: GIT, SVN, CVS.
Methodologies: Agile, Waterfall, TDD.
Browsers: Internet Explorer, Firefox, Chrome.
Data Bases: Oracle, MY SQL.
Operating Systems: Windows, LINUX, UNIX.

Professional Experience:

Client: ThinkTech Software Inc.	Location: Calgary, AB
Role: Front End/UI Developer	Date: Apr 2018 – Till Date

Responsibilities:
- Involved in development, design and implementation of front end part of the application.

- Developed the User Interactive web pages in a professional manner with using web technologies like **HTML5, XHTML**, and **CSS3** as per company's standards.
- Created and maintained the framework and layout of each portal with **Cascading Style Sheets (CSS).**
- Successfully implemented Auto Complete/Auto Suggest functionality using **Ajax, JQuery, DHTML, Web Service call and JSON.**
- Responsible to manipulate **HTML5**, **CSS3** in **JQuery** as well as making the pages dynamic using **AJAX**, **JSON** and **XML**.
- Used **Angular 5** to develop the front end of the payment process web application.
- Worked with **Angular 5** Forms, Validations, Modules, Factory Services, **DOM,** Events, Expressions, Directives, Controllers, filters.
- Created **TypeScript** reusable components and services to consume **REST API's** using Component based architecture provided by **Angular 4.**
- Worked one-on-one with client to develop layout, color scheme for his website and implemented it into a final interface design with the **HTML5/CSS3** & **JavaScript** using **Dreamweaver**.
- Used package **Webpack** package bundlers in task runner like grunt/gulp along with **Node.js** for build automation and management.
- Utilized various **JQUERY** plugins to build Rich Internet Application (**RIA**) to make it look more intuitive.
- Extensively participated in developing the website across different browsers and performed cross-browser testing.
- Extensively used **HTML5** for audio and video playback.
- Extensively used **CSS and Bootstrap** for styling the **HTML** elements.
- Extensively used **SASS** (Syntactically awesome style sheets) while styling with CSS3.
- Developed **CSS styles** to maintain the uniformity of all the screens throughout the application and positioning of screen objects. Involved in creating and consuming **Restful Web Service** using **Node JS.**
- Developed **complex, useable, attractive and cross-browser web interfaces** that account for speed, file size, readability and accessibility.
- Used **JSON** for storing and exchanging information between browser and servers.
- Developed programs to port the xml data to database to make the website xml driven.
- Designed the email blasts using Adobe software and then implemented them using **HTML and Java script.**
- Demonstrated implementation and **up-gradation of JavaScript Library.**
- Used **Git** as our source/version control system and Atom/sublime Text editors for development tool.
- Involved in **AGILE** process, Monthly Sprints, and daily Scrums to discuss the development of the application.

Technologies: JavaScript, JQuery, JSON, Ajax, HTML5, DHTML, CSS3, SASS, Angular 5/4, Bootstrap, TypeScript, Webpack, Node.js, Agile, Rest API, Git, Windows.

Client: Iversoft	Location: Ottawa, ON.
Role: Front End/UI Developer	Date: Nov 2016 – Mar 2018

Responsibilities:
- Involved in Requirements and Analysis Understanding the requirements of the client and the flow of the application as well as the application Framework
- Developed the UI Screens using **HTML5, DHTML, XML, Java Scripts, Ajax, JQuery Custom-tags, JSTL DOM Layout and CSS**.
- Responsible for the overall layout design, color scheme of the web site using **HTML5**, **XHTML** and **CSS3** and Responsible for creating detailed wire frames and process flows.
- Used **Bootstrap** and **Angular.js** for effective design of Web pages.
- Developed various screens for the front end using **React.js** and used various predefined components from **NPM** (Node Package Manager) and **Redux library.**
- Developed cross-browser/platform **HTML5**, **CSS**, and **JavaScript** to match design specs for complex page layouts while adhering to code standards
- Used **Rxjs** in **Angular 2** to make the HTTP requests to the **REST API** for getting the user details.

- Built dynamic web pages with **Angular 2.0** with styling supported by Twitter Bootstrap for creating **Responsive Websites.**
- Designed dynamic client-side **JavaScript** codes to build web forms and simulate process for web application, page navigation and form validation.
- Configured routes between **React.js** and **Flask** to render the templates from the server-side.
- Developed the **Restful Web Services** in **Node.js** and exposed as a **Micro Service.**
- Incorporate the **AJAX scripts** to improve the performance of the page.
- Provided graphic and artistic support for web enhancement and new creative initiatives
- Developed client side validation code using **JavaScript** and **JQuery**.
- Extensively involved in redesigning the entire site with **CSS, SASS, LESS** styles for consistent look and feel across all browsers and all pages.
- Extended **CSS** as needed to accommodate new data and display types.
- Performed validation of completed sites including the debugging and testing of code.
- Responsible for quality assurance of finished websites including the validation of web forms and links.
- Involved in daily **agile** meetings to keep track of the ongoing project status and issues.
- Participated in everyday SCRUM meetings to discuss about ongoing project and related issues.

Technologies: Angular 2, Angular.js, Bootstrap, Responsive Web Design, JavaScript, HTML5, CSS3, JQuery, AJAX, Agile, React.js, Redux, NPM, TypeScript, SASS, LESS, Rest API, Eclipse and Windows.

Client: Intelliware Development Inc.	Location: Toronto, ON
Role: UI Developer	Date: Apr 2015 – Oct 2016

Responsibilities:
- Analyzed business requirements, participated in technical design, development and testing of various modules assigned.
- Worked as the main UI developer and delivered the module as per the business need and wireframes using front end technologies **HTML5, CSS3, JavaScript, jQuery and Bootstrap.**
- Developed data insertion forms and validated them using **JavaScript.**
- Created and maintained the framework and layout of each portal with Cascading Style Sheets (CSS).
- Involved in developing **HTML5 and JavaScript** for client side presentation and, data validation on the client side with in the forms.
- Created **Responsive Designs** (Mobile/Tablet/Desktop) using **HTML5 & CSS3.**
- Developed html views with **HTML5, CSS3, Bootstrap** and **JavaScript.**
- Used **JavaScript and XML** to update a portion of a web page thus reducing bandwidth usage and load time and add modal dialog in web pages to get user input and requests.
- Coded **JavaScript** for page functionality and Pop up Screens and used **DHTML** to make dropdown menus on web pages and display part of a web page upon user request.
- Designed dynamic client-side **JavaScript codes** to build web forms and simulate process for web application, page navigation and form validation.
- Using **Angular.JS** created custom directives to display data in UI.
- Used **Angular.JS** as framework to create a Single Page Applications (SPA) which can bind data to specific views and synchronize data with server.
- Developed **CSS3** style sheets to give gradient effects.
- Worked on **Bootstrap CSS** framework for **Responsive Web Design.**
- Worked on **JQuery** to make dropdown menus on web pages and display part of a web page upon user request.
- Involved in providing pseudo application level code to interact with API's, Web Services using **AJAX, JSON** and **XML.**
- Responsible for checking cross browser compatibility issues and hence worked on different browsers like **Google chrome, Internet explorer, Firefox and safari.**
- Validated input values to make sure that they will be accepted before they are submitted to the server.
- Participated in everyday SCRUM meetings to discuss about ongoing project and related issues.

- Worked closely with product managers, developers and internal stakeholders throughout the product design.

Technologies: Java Script, HTML, CSS, AJAX, JQuery, Angular.js, Bootstrap, Responsive Web Design, XHTML, XML, XSL, SQL Server and Windows XP.
